

PAX annotations

The screenshot displays the GATE Developer 6.0-snapshot build 3581 interface. The main window shows a text document with several paragraphs of text. The text is annotated with various PAX (Pseudo-XML) tags, including `MultiPaX`, `StanfordParser`, `Supple`, and `Minipar`. The annotations are color-coded and include features like `iseg`, `obj`, `parser`, `sub`, and `verb`.

The left sidebar shows the GATE project structure, including Applications, Language Resources, Processing Resources, and Datastores. The right sidebar shows the Annotation Sets, Annotations List, Annotations Stack, Co-reference Editor, and Text. The bottom status bar indicates that the document is named "example.txt_000..." and that the processing time for the document is 349,535 seconds.
