A Sample of Java code and comments taken from ArgoUML

```java
package org.argouml.model;

import java.beans.PropertyChangeListener;

/**
 * Abstract class that implements the convenience methods of the
 * {@link ModelEventPump} interface.
 *
 * @author Linus Tolke
 */
public abstract class AbstractModelEventPump implements ModelEventPump {
    /*
     * @see org.argouml.model.ModelEventPump#addModelEventListener(
     *          java.beans.PropertyChangeListener, java.lang.Object,
     *          java.lang.String)
     */
    public void addModelEventListener(PropertyChangeListener listener, Object modelelement, String eventName) {
        addModelEventListener(listener, modelelement, new String[] {eventName});
    }
}
```
