Title	Semantic Technologies in System Maintenance
Publication Type	Conference Paper
Year of Publication	2008
Refereed Designation	Non-Refereed
Authors	Rilling, J. [5], R. Witte [6], D. Gasevic [7], and J. Z. Pan [8]
Conference Name	The 16th IEEE International Conference on Program Comprehension (ICPC 2008)
Pagination	279--282
Date Published	June
Publisher	IEEE
Conference Location	Amsterdam, The Netherlands
Type of Work	Editorial
Abstract	This paper gives a brief overview of the International Workshop on Semantic Technologies in System Maintenance. It describes a number of semantic technologies (e.g., ontologies, text mining, and knowledge integration techniques) and identifies diverse tasks in software maintenance where the use of semantic technologies can be beneficial, such as traceability, system comprehension, software artifact analysis, and information integration.
