Title	Connecting Wikis and Natural Language Processing Systems
Publication Type	Conference Paper
Year of Publication	2007
Refereed Designation	Refereed
Authors	Witte, R. [10], and T. Gitzinger [11]
Conference Name	WikiSym '07: Proceedings of the 2007 International Symposium on Wikis
Pagination	165–176
Date Published	October 21--23
Publisher	ACM
Conference Location	Montréal, Canada
ISBN Number	978-1-59593-861-9
Keywords	Design [12], Human Factors [13], Languages [14], Self-aware Wiki System [15], Wiki/NLP Integration [16]
Abstract	We investigate the integration of Wiki systems with automated natural language processing (NLP) techniques. The vision is that of a "self-aware" Wiki system reading, understanding, transforming, and writing its own content, as well as supporting its users in information analysis and content development. We provide a number of practical application examples, including index generation, question answering, and automatic summarization, which demonstrate the practicability and usefulness of this idea. A system architecture providing the integration is presented, as well as first results from an initial implementation based on the GATE framework for NLP and the MediaWiki system.
