

Re: Couldn't find parser output - check inputASName! - ErrorPAX

Submitted by Anonymous on Mon, 2010-08-09 21:13

- [Semantic Software Tools and Resources](#) [1]

I am using stanford parser input to the Multipax in GATE.

All annotations are stored in one name (ie from tokenization to parsing) myannotations.
When multipax is run, I get the error message - Couldn't find parser output-checkinputasname!.
Please help me to fix this.

thanks in advance.

[MultiPaX new release and eventual tweak](#) [2] [Greetings from LREC 2008](#) > [3]

It worked.

Submitted by vlisr (not verified) on Tue, 2010-08-10 09:15.

It worked.

I didnot know that the ParserAs name is case sensitive.
It is running fine.
