

MultiPaX null pointer exception

Submitted by Anonymous on Sat, 2010-08-14 04:54

- [Semantic Software Tools and Resources](#) [1]

I was trying to embed MultiPaX into a GATE pipeline using the gapp file mechanism.

I noticed that when doing so, MultiPaX dies with a null pointer exception because in lines 145 and 196 it assumes a non-null StatusListener object. Commenting these lines out appears to work. I'm not sure if that's the best approach to the problem, but I thought you may want to be aware of the potential problem.

Gui Status Listener

Submitted by ralf on Thu, 2010-08-19 15:37.

Thanks for the comment. We were indeed not checking whether the GUI is used or not. In the next release we will fix this...
