Title	{ Context-based Multi-Document Summarization using Fuzzy Coreference Cluster Graphs }
Publication Type	Conference Paper
Year of Publication	2006
Refereed Designation	Non-Refereed
Authors	<a href="#">Witte, R.</a> [5], <a href="#">R. Krestel</a> [6], and <a href="#">S. Bergler</a> [7]
Conference Name	Proceedings of Document Understanding Workshop (DUC)
Date Published	June 8–9
Conference Location	New York City, NY, USA
Abstract	Constructing focused, context-based multi-document summaries requires an analysis of the context questions, as well as their corresponding document sets. We present a fuzzy cluster graph algorithm that finds entities and their connections between context and documents based on fuzzy coreference chains and describe the design and implementation of the ERSS summarizer implementing these ideas.
