Title	{ An Integration Architecture for User-Centric Document Creation, Retrieval, and Analysis }
Publication Type	Conference Paper
Year of Publication	2004
Refereed Designation	Refereed
Authors	<a href="#">Witte, R.</a> [6]
Conference Name	Proceedings of the VLDB Workshop on Information Integration on the Web (IIWeb'04)
Pagination	141–144
Date Published	August 30
Conference Location	Toronto, Canada
Abstract	<p>The different stages in the life-cycle of content—creation, storage, retrieval, and analysis—are usually regarded as distinct and isolated steps. In this paper we examine the synergies resulting from their integration within a single architecture.</p> <p>Our goal is to employ such an architecture to improve user support for knowledge-intensive tasks. We present a case study from the area of building architecture, which is currently ongoing.</p>
