Title	{Multi-ERSS and ERSS 2004}
Publication Type	Conference Paper
Year of Publication	2004
Authors	Bergler, S. [4], R. Witte [5], Z. Li [6], M. Khalife [7], Y. Chen [8], M. Doandes [9], and A. Andreevskaia [10]
Refereed Designation	Non-Refereed
Conference Name	Proceedings of Document Understanding Workshop (DUC 2004)
Date Published	May 6–7
Publisher	NIST
Conference Location	Boston Park Plaza Hotel and Towers, Boston, USA
Abstract	Last year, we presented a system, ERSS, which constructed 10 word summaries in form of a list of noun phrases. It was based on a knowledge-poor extraction of noun phrase coreference chains implemented on a fuzzy set theoretic base. This year we present the performance of an improved version, ERSS 2004 and an extension of the same basic system: Multi-ERSS constructs 100-word extract summaries for clusters of texts. With very few modifications we ran ERSS 2004 on Tasks 1 and 3 and Multi-ERSS on Tasks 2, 4, and 5, scoring generally above average in all but the linguistic quality aspects.
