Problems Installing Semantic Assistants

Submitted by Anonymous on Fri, 2010-09-10 03:51

- Semantic Assistants [1]

I am completely new to Semantic Assistants and I am trying to start the server, but I have too many problems trying to place the additional .jar files in their correct place.
Does anyone have a detailed explanation about the installation process?
Thanks so much,

Maria.

Hi Maria,

Chapter 2 in the documentation lists all the .jar files needed and where they should go. You can find it on
http://www.semanticsoftware.info/semantic-assistants-architecture [5]

Afterwards, you have to edit the SemassistProperties.xml file to point to their correct locations.

Best, René
