

Wsimport Failed

Submitted by Anonymous on Tue, 2010-09-14 09:57

- [Semantic Assistants](#) [1]

Hi,

I Followed the steps in documentation to run the server and it's running successfully. i can see the WSDL description in my browser. but when i am trying to run CSAL build target ant dist, its wsimport target failed. can you please help me in that. below is the build output of wsimport

```
D:\OfficeProject\Repository\durm\Projects\SemanticAssistants\CSAL>ant wsimport
Buildfile: D:\OfficeProject\Repository\durm\Projects\SemanticAssistants\CSAL\build.xml
```

init:

wsimport:

```
[wsimport] Consider using / so that wsimport won't do unnecessary compilation
[wsimport] Exception in thread "main" java.lang.NullPointerException

seems to be a Windows-specific problem

Submitted by rene on Tue, 2010-09-14 10:08.

Hello,

This problem keeps appearing on Windows PCs, we're looking into it. Also see this comment: <http://www.semanticsoftware.info/forum/csal-distribution-problem#comment-52> [6]

The upcoming beta3 should improve things for Windows users. A short-term solution is to run it on Linux.

René

Use jax-ws 2.1.x

Submitted by rene on Mon, 2010-10-04 06:47.

Make sure to use a 2.1.x version of jax-ws, the current beta does not work with a 2.2.x version: <https://jax-ws.dev.java.net/> [7]
