- [Semantic Assistants](#) [1]

Hello Mate,

I have traid to configure the system but it is not straightforward. My system envirenment is

Apache ANT

Java 1.6

OS Ubuntu 10

OpenOffice SDK 3.2

OpenOffice 3.3

Protege

Gate 6

When I run server it presents failure message

```
[fah@fah-laptop:~/Repository/durm/Projects/SemanticAssistants/Server$ sudo ant run
[sudo] password for fah:
Buildfile: build.xml
```

compile:

wsgen:

[wsgen] command line: wsgen -classpath

/home/fah/Repository/durm/Projects/SemanticAssistants/Server/bin:/usr/local/durmttools/GATE/gate/bin/gate.jar -d

/home/fah/Repository/durm/Projects/SemanticAssistants/Server/bin -keep -s

/home/fah/Repository/durm/Projects/SemanticAssistants/Server/bin -verbose

info.semanticsoftware.semassist.server.SemanticServiceBroker

BUILD FAILED

Which version?

Submitted by rene on Mon, 2010-11-08 08:31.

Hi,

Which version are you trying to install, the old beta2 or the current development version from SourceForge?

Remember you must update the properties file to point to your local installation. A common problem is using the wrong version of jaxws-ri: currently, only 2.1 is supported (2.2 does not work). It looks like you either have the wrong version or did not update the property "jaxws.home" in SemassistProperties.xml.

Hi

I use the previous ver. but I fix the problem and it works thanks

Thanks a lot

glad it works

Submitted by rene on Thu, 2010-11-11 19:07.

Ok, glad it works. Check out the current SourceForge version, we are in the process of enhancing the architecture and making it easier to install as well.
