Title	Towards A Systematic Evaluation of Protein Mutation Extraction Systems
Publication Type	Journal Article
Year of Publication	2007
Authors	Witte, R. [6], and C. J. O. Baker [7]
Refereed Designation	Refereed
Journal	Journal of Bioinformatics and Computational Biology (JBCB)
Volume	5
Issue	6
Pagination	1339–1359
Date Published	December
Keywords	mutation extraction systems; mutation evaluation tasks; mutation evaluation metrics [8]
Abstract	The development of text analysis systems targeting the extraction of information about mutations from research publications is an emergent topic in biomedical research. Current systems differ in both scope and approaches, which prevents a meaningful comparison of their performance and therefore possible synergies. To overcome this "evaluation bottleneck," we developed a comprehensive framework for the systematic analysis of mutation extraction systems, precisely defining tasks and corresponding evaluation metrics that will allow a comparison of existing and future applications.
