Title	Empowering the Enzyme Biotechnologist with Ontologies
Publication Type	Conference Paper
Year of Publication	2007
Refereed Designation	Refereed
Authors	Baker, C. J. O. [5], A. Shaban-Nejad [6], R. Witte [7], V. Haarslev [8], and G. Butler [9]
Conference Name	10th International Congress on Biotechnology in the Pulp and Paper Industry (ICBPPI 2007)
Date Published	June 10–14
Conference Location	Monona Terrace, Madison, Wisconsin, USA
Type of Work	Poster
Abstract	The FungalWeb Ontology is a knowledge representation vehicle designed to integrate information relevant to industrial applications of enzymes. The ontology integrates information from established sources and supports complex queries to the instantiated FungalWeb knowledge base. The ontology represents prototype Semantic Web technology customized to the domain of industrial enzymes with a focus on enzyme discovery, commercial enzyme products and vendors, and the industrial applications and benefits of industrial enzymes. Using a series of application scenarios we demonstrate the utility of this 'Semantic Web' infrastructure to the enzyme biotechnologist.
