I have downloaded and unpacked the Multipax-1.3.tgz file. Now, I am unable to build and create the .jar file because of the following error

...\build.xml:90 : C:\usr\local\durmtools\GATE_SVN\gate\lib does not exist

Please help

Hello,

You have to edit the build.properties file to change the path to your local installation of GATE:

1. `gate.home=/usr/local/durmtools/GATE_SVN/gate`
