CfP: 1st Workshop on Automatic Text Summarization of the Future

*** Satellite workshop to SEPLN 2012 (Castellón, Spain)***

http://www.taln.upf.edu/pages/sepln_ws_2012/

ABOUT THE WORKSHOP:

Due to the great proliferation of online documents and information, it becomes necessary to develop automatic tools capable of filtering redundant and irrelevant information, thus presenting the most important one in an efficient and effective manner. This is the goal of Automatic Summarization, which aims at producing a concise document, keeping the essential information of a document or set of documents.

Research into Automatic Summarization began in the 50s with the purpose of summarizing scientific texts. However, the interest for this type of documents decreased, while the interest in news article summarization grew. Recently, new challenges have appeared in this research area. In the context of the Internet, not only is information being constantly updated, but there is also a lack of quality control of what is being published on the Web. Social networks, blogs, reviews, etc. are non-traditional texts of informal nature, and they therefore constitute a big challenge for the new generation of summaries.

High quality documentation such as technical/scientific articles and patents has not received in the past years all the attention that the field deserves. However, given the explosion of technical documentation available on the Web and in intranets, scientific and research and development institutions face a true scientific information deluge. Therefore, summarization should be a key instrument not only for reducing information content in this field but also for measuring information relevance in context, providing users with adequate answers in context.

Another challenge for automatic summarization is the generation of abstracts, where it is necessary to take into consideration natural language generation techniques and be able to adapt them from one domain to another. In addition to these, efforts are needed to produce summaries in languages other than English and in multiple languages.

Therefore, the main goal of the 1st Workshop on Automatic Text Summarization of the Future is to bring together researchers

Published on semanticsoftware.info (<https://www.semanticsoftware.info>)

working

on Automatic Summarization, encouraging research into little explored areas such as new textual genres as well as old, forgotten ones, or summarization in languages other than English (for instance, Spanish).

IMPORTANT DATES:

Papers submission deadline: (EXTENDED): 29 June 2012

Notification of decisions to authors: 20 July 2012

Workshop date: 7th September 2012

Camera-ready: 20 July 2012

SUBMISSIONS:

We will accept full paper contributions for the workshop. These papers should be written in English, with a maximum length of 8 pages, including references. The submission guidelines can be found on the following page: http://www.sepln.org/?page_id=358

Reviewing for the papers will be blind: reviewers will not be presented with the identity of paper authors. Authors should avoid writing anything that makes their identity obvious in the text. Submissions should be original, and in particular should not have been formally published prior to submission for the workshop.

Accepted papers will be published in the Workshop proceedings, with ISBN. We are negotiating the edition of a journal special issue for the best submitted papers. More to be announced.

The submission site for the workshop will be announced with the second call for papers and will be available from the workshop Web site at http://www.taln.upf.edu/pages/sepln_ws_2012/.

TOPICS OF INTEREST:

Researchers are encouraged to submit papers including, but not restricted to the following topics:

- Multi-document summarization
- Summarization for new textual genres (blogs, microblogs, social networks, etc.)
- Abstractive summarization
- Multilingual/crosslingual summarization
- Development of resources, corpora, tools, etc. for summary generation
- Summarization for facilitating information access
- Applications of Summarization and Demos
- Summarization for technical and/or scientific documents
- Intrinsic and/or Extrinsic Evaluation of Summaries

ORGANIZERS:

Horacio Saggion -- Universitat Pompeu Fabra, horacio.saggion@upf.edu

Elena Lloret -- Universidad de Alicante, elloret@dlsi.ua.es

Manuel Palomar -- Universidad de Alicante, mpalomar@dlsi.ua.es

PROGRAM COMMITTEE:

Laura Alonso (Universidad Nacional de Córdoba, Argentina)
Ahmet Aker (University of Sheffield, UK)
Ester Boldrini (Universidad de Alicante, Spain)
Hakan Ceylan (University of North Texas, USA)
Iria da Cunha (Universitat Pompeu Fabra, Spain)
Alberto Díaz (Universidad Complutense de Madrid, Spain)
Maria Fuentes (Universitat Politècnica de Catalunya, Spain)
Robert Gaizauskas (University of Sheffield, UK)
George Giannakopoulos (University of Trento, Italy)
Nicolas Hernandez (Université de Nantes, France)
Leila Kosseim (Concordia University, Canada)
Guy Lapalme (Université de Montreal, Canada)
Jean-Luc Minel (Université Paris X, France)
Paloma Moreda (Universidad de Alicante, Spain)
Rafael Muñoz (Universidad de Alicante, Spain)
Ani Nenkova (University of Pennsylvania, USA)
Thiago Pardo (Universidade de São Paulo, Brazil)
Laura Plaza (Universidad Complutense de Madrid, Spain)
Horacio Rodriguez (Universitat Politècnica de Catalunya, Spain)
Jorge Vivaldi (Universitat Pompeu Fabra, Spain)
René Witte (Concordia University, Canada)
Dina Wonsever (Universidad de la Republica, Uruguay)
