OWLExporter ontology export

Submitted by elang [1] on Tue, 2012-07-10 13:45

- Semantic Software Tools and Resources [2]

Hi all,
I am using GATE 7.0 devoloper edition and OWLExporter 3.0 on Ubuntu 12.04 32-bit.

I am able to run the exporter on my corpus and see the annotations in GATE (none of them are empty).

Unfortunately, the "domain_out.owl" and "nlp_out.owl", in the gate/application-resources/ontologies/ are the default ontologies (i.e. the ontologies that were there in the first place). I have also tried changing the location of the savefile in the OWLExporter tab, to no effect.

Can anyone please help me?

wait for the GATE7 release

Submitted by rene on Tue, 2012-07-10 17:58.

Hello,

As mentioned in this thread: http://www.semanticsoftware.info/forum/owlexporter-and-gate-7 [6] there are some updates required for GATE7. We plan to release the new OwlExporter version some time next week.

Hey, thanks for the prompt

Submitted by elang on Wed, 2012-07-11 06:12.

Hey, thanks for the prompt reply.
I will be more than happy to use the update which you release next week, but could you please give me a development package? I am working on something right now and it eould be great if could start right away.

Thanks in advance.

snapshot release

Submitted by rene on Thu, 2012-07-12 06:32.

I sent it to the email in your profile. It's a snapshot of our development version; it should work, but we can't give any support for this version, so if you run into problems I'm afraid you'll have to wait for the official release.

Hey, thanks a lot again for

Submitted by elang on Tue, 2012-07-17 02:15.

Hey, thanks a lot again for mailing it to me. Unfortunately, it did not solve my issues.
I understand it will be impractical to extend support for a nightly release.
I guess I will wait for the stable release. Really looking forward to it.

Try release 3.1

Submitted by rene on Wed, 2012-07-18 22:44.

We uploaded OwlExporter 3.1 for GATE 7; you can now install it directly from GATE's Plugin Manager and run the included example pipeline.

Please let us know if it still doesn't work for you.

Cheers, René
