Hi,

OMM impacts loaded I think with warnings as shown below

One more thing: Do you have a tutorial how to use OMM mutation or OMM impact after loading since I have never dealt with GATE before. At least how to test a corpus and see annotations, I would be thankful.

SLF4J: Class path contains multiple SLF4J bindings.

Check the GATE documentation

These are normal diagnostic messages, OMM Impacts should run fine now.

If you never worked with GATE, I highly recommend to read the excellent documentation [8]. In particular, the GATE Developer screencams [9] show you how to load documents, view annotations, etc.

Cheers, René
