To run OMM Impact, I don't see any sample files to run it, am I wrong?

One more thing, I tried to see the annotations using impact.xml, I can't see any annotations.

Hi Kyle,

No, we don't include example documents. Simply run OMM on any paper you're interested in analyzing.

The file "impact.xml" is an annotation schema; you only need this if you want to add your own manual annotations to a document (for building your own gold standard). This is explained in Chapter 4 in the OMM documentation, under "*Corpus Preparation and Manual Annotation*". For additional information on [annotation schemas](#) [6], please refer to the GATE documentation.

Best, René
