Hi,

I would like to use Mutation Miner but not from GUI. Am new to GATE and i am using GATE embedded so kindly i need to know what steps i need to take to get "Mutation Miner" to work and getting its annotations using GATE embedded.

Thanks

### Same as other GATE pipelines

Submitted by rene on Wed, 2015-09-09 13:23.

Hello,

It works the exact same way as with any other GATE pipeline, so you should probably review the GATE documentation and training material on GATE Embedded first:

1. Load the .xgapp file you want to use into a CorpusController

```
CorpusController ommApp = (CorpusController)
PersistenceManager.loadObjectFromFile(new File [ 6 ] (appName));
```

(where appName is the filename of the .xgapp file you want to load)
2. Assign a corpus to the controller:

```
otApp.setCorpus(myCorpus);
```
3. Add documents to the corpus, and process them with ommApp.execute()

Hope that helps,

René
