Semantic Assistants 1.0-beta2 released

Submitted by rene [1] on Tue, 2009-12-29 17:47

- Semantic Assistants [2]

We just released a second beta version of our Semantic Assistants [3]. Major changes to the first beta are:

- Easier way to connect to different servers offering NLP Web services in both clients, using a new runtime parameter in the command line client and a new GUI option in the OpenOffice.org Writer client plugin
- An option to build the CSAL using cached WSDL descriptions (so that no running server is needed for generating client-side code for the Web services)
- Some compatibility improvements for compiling the architecture using the latest Java 6 JDK and Web services reference implementation, JAX-WS 2.1.7

Download the latest version and documentation from the Semantic Assistants Architecture [4] page.

Enjoy!
